* Although described as being in five parts, this piece demands a double choir for its adequate performance, as the effect of the whole depends greatly on the occasional sub-division of Soprano and Tenor.

The "Mermaid's Song" should be vocalized with the utmost possible smoothness, and *mezza voce*, so as to sound, as it were, at a distance. In the *ritenuto* of its last bars the degree of slackening of tempo must be arranged to suit the convenience of the Soprani and Alti; but, this once settled, the time must be given by the Tenors and Bases.
