

Menuet

HWV 531

Georg Friedrich Händel

1)
2)

9

15

It is highly unlikely or can even be excluded that Händel composed a first part of a menuet with uneven 7 bars. So this may be a coping error of the preserved version of the menuet HWV 531.

It is proposed to fill

1) in the upper part bar no. 5 and

2) in the lower part bar no. 6.

It follows the preserved version with 7 bars (also recorded by Segovia and Ragossnig):
