

2bardelay

A Curious Duet

When keyboards face each other,
every key gives a different note from the one opposite.
All except the D key in the middle.

A

A plays the
original melody.

B

After a 2 bar delay, B begins to copy, from the start,
exactly the pattern of movements made by A
...giving an entirely new second melody
to complete the duet.

♩ = 105

D Sheldon
