

Ehsan Saboohi

Meet Mr. Debussy

(for the Contemporary Pianist)

Performance notes :

1. Players of string instruments are regularly called upon to produce harmonics. The performer

places the finger lightly on a node of the string in order to produce a specific harmonic.

Harmonics on the piano can be produced by touching the proper node of the string with the fingertip of one hand and striking the corresponding key with the other hand.

2. Pedal sound only:

Pedal tremolo verbal instructions should always accompany a pedal- sound effect. Electronic- amplification of the sound is suggested since the strings reverberate only very softly.
